

Cross-sector cascade footprint of major supply-chain / platform incidents, 2020-2026

Binary coding: a cell is filled only where public reporting confirms meaningful sector impact (conservative).

AI-enabled adversarial tooling proliferates (WormGPT / FraudGPT, mid-2023)

Sources: CISA, government advisories, Mandiant/CrowdStrike/Emsisoft analyses, and major-press reporting per incident (see CODING_RATIONALE.md). Rows with sparse fills (e.g. Log4j, Okta) reflect high cascade potential but limited documented realized impact.
